Bengaluru

PROFESSIONAL SUMMARY

Results-driven Python Developer and FastAPI Developer with hands-on experience building scalable backend systems, RESTful APIs, and AI-integrated applications. Proven expertise in Python, FastAPI, Pydantic, and MongoDB, with additional working knowledge of React.js and Node.js. Strong knowledge of data validation, relational databases, backend task queues, Docker containerization, AWS cloud services, and Agile methodologies. Passionate about writing clean, modular, and performance-optimized Python code.

Core Competencies: Python, FastAPI, Backend Development, REST API Design, Pydantic, OAuth2 & JWT, SQLAlchemy, Alembic, PostgreSQL, MongoDB, Celery, Redis, Docker, AWS, Git, Agile/Scrum, CI/CD, Data Structures & Algorithms, Machine Learning (scikit-learn), Web Scraping, Data Analysis

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), Python, SQL, Java, HTML5, CSS3
Backend Development: FastAPI, Node.js, Express.js, RESTful APIs, Dependency Injection, Pydantic, OAuth2, JWT
Frontend Development: React.js, Vite, Responsive Web Design, User Interface Design, Framer Motion
Databases & Migrations: MongoDB (Motor), SQLAlchemy, Alembic, PostgreSQL, SQLite, Query Optimization
DevOps & Cloud: AWS (EC2, S3, RDS), Docker, Docker Compose, Celery, Redis, Git, GitHub, CI/CD, Agile Sprints
Machine Learning & NLP: scikit-learn, Google Gemini API, Predictive Modeling, NLP, Data Analysis

EDUCATION

Anjuman Institute of Technology and Management Oct. 2023 – June 2027
Bachelor of Engineering in Computer Science and Engineering | CGPA: 8.0+/10, Bengaluru, India
• Core Coursework: Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks, Software Engineering

PROFESSIONAL EXPERIENCE

Buildbench Company — Web Developer Intern June 2026 – Aug. 2026
Bengaluru, India
• Completed an internship as a Web Developer Intern, contributing to website development, testing, and maintenance using modern web technologies.
• Performed assigned duties sincerely, demonstrated a strong willingness to learn, and maintained a professional attitude throughout the internship.

Azmith — Full Stack Developer Intern Nov. 2025 – April 2026
Bengaluru, India
• Built Hotel Bus, an AI-powered waiter platform, using React.js, Node.js, Express.js, and MongoDB.
• Implemented core application features and RESTful APIs, and collaborated in Agile sprints to gather requirements and deliver functionality on schedule.

TECHNICAL PROJECTS

Hotel Bus – AI-Powered Waiter Platform – GitHub 2026
Python, FastAPI, React.js, Vite, MongoDB, Gemini API, Framer Motion
• Engineered a real-time ordering platform enabling customers to scan table QR codes, chat with an AI waiter (Kai), and place orders.
• Built the Python/FastAPI backend with async database operations using Motor for MongoDB, and integrated Gemini 1.5 Flash for personalized product suggestions.

AITM Airlines – National Aviation Intelligence & Airfare Index – Live | GitHub 2026
Python, Web Scraping, Data Analysis, FastAPI, Next.js
• Built an end-to-end platform for Smart India Hackathon 2026 (Problem Statement 26056, proposed by MoSPI) scraping live fare data from major Indian carriers and OTAs (IndiGo, Air India, Akasa, SpiceJet, MakeMyTrip, Yatra, Ixigo).
• Cleaned, normalized, and processed scraped data in Python to compute a Real-Time Airfare Price Index (FareX) across 80 city-pair routes, with a 30-day forward trend tracker, route-level heatmap, and carrier-level deep dives.
• Built a simulation and calculator module for analysts to model fare movement, with methodology aligned to MoSPI's CPI framework for potential real-world policy use.

Crop Suggestor – ML-Based Agricultural Tool – Live | GitHub 2025
Python, scikit-learn, Netlify
• Developed a Random Forest classifier in Python achieving 87% accuracy on a dataset of 10,000+ data points including rainfall, pH, and temperature.
• Created a responsive web interface to display dynamic, data-driven crop recommendations, utilized by 200+ users.

AI Diet Planner – GitHub 2025
Python, Machine Learning, Data Science
• Developed an AI-powered meal planning system in Python using ML to generate personalized diets based on user profiles.

CERTIFICATIONS & TRAINING

- RESTful API Development with FastAPI – FastAPI Certificate (2026): Pydantic validation, SQLAlchemy ORM, Alembic migrations, OAuth2 authentication, Celery workers, and Docker deployment.
- Full Stack Web Development (MERN) – Udemy (2025).
